West of mapped area unit contains 2-cm phosphatic (?) concretions, 2-cm to 30-cm dish-and-pHlar structures typical of some beds. Some sandstone marker beds mapped. Shale rarely calcareous or fetid, and massive to parallel- or ripple cross-laminated. Sole marks and (crinoids, brachiopods, gastropods, corals) micrite and parallel- to rarely cross-stratified crinoids, corals, and brachiopods. Beds typically 2 cm to 1 m thick, amalgamated, and mostly
