

OIL AND GAS FIELDS OF OKLAHOMA, 1965

by
OKLAHOMA GEOLOGICAL SURVEY
Prepared with the cooperation of the petroleum industry
Supervised by Louise Jordan; compiled by Thomas N. Roberts and
Kenneth R. Burns; scribed by David M. Deering

1966

MARKETED PRODUCTION AND VALUE OF PETROLEUM, NATURAL GAS, NATURAL GASOLINE, AND LIQUEFIED PETROLEUM GAS IN OKLAHOMA, 1891-1965¹

YEAR	CRUDE PETROLEUM		NATURAL GAS		NATURAL GASOLINE AND CYCLE PRODUCTS		LIQUEFIED PETROLEUM GAS	
	VOLUME (1,000 BBL)	VALUE (\$1,000)	VOLUME (MMCF)	VALUE (\$1,000)	VOLUME (1,000 GAL)	VALUE (\$1,000)	VOLUME (1,000 GAL)	VALUE (\$1,000)

¹ Figures from: Oklahoma Geological Survey Circular 29 (compiled from U. S. Geological Survey and U. S. Bureau of Mines publications); *Minerals Yearbooks*, U. S. Bureau of Mines (from 1952 to present).

Values for natural gas from 1947 to present estimated at wells; values for previous years estimated at points of consumption.

Natural gasoline includes natural and finished gasoline, naphtha, and other products and liquefied petroleum gas through 1940; liquefied petroleum gas listed separately beginning in 1941.

Totals for crude petroleum differ from those compiled by the U. S. Bureau of Mines and the American Petroleum Institute principally because of the exclusion from U. S. B. M. and A. P. I. compilations of the estimated production of 26,355,000 barrels reported herein for the years 1905-1906.

² Preliminary figures for 1965.
