

THE SIMPSON PLAY

(Including parts of the Arbuckle & Viola)

WORKSHOP

Moore-Norman Technology Center
October 25th, 2016

Purpose and Scope of this Meeting

This workshop will provide the most up-to-date and comprehensive investigation of the Simpson Group in Oklahoma. Important discussions will include but are not limited to stratigraphy, petroleum sourcing and hydrocarbon potential, rock properties, subsurface mapping, and structure. Many original maps and cross sections are provided in the publication dedicated to this important group of strata including sandstone, limestone, and dolomite.
